

# Strapack®

## Recycled Packaging Material Machine

Just put your waste corrugated and paper into the ECOWATT and it is converted into cushioning material. The ECOWATT's cutter keeps the shredded material connected, leaving no messy scraps. The elasticity of the shredded cushioning material can be adjusted to meet your packaging needs.

### ■ Savings

You'll create packing material with no material cost. Why dispose of your excess corrugated when you can convert it into a reusable resource by recycling on-site? Save on disposal costs . . . save on packing material costs.

### ■ Easy to Use

The Strapack ECOWATT shreds and trims the edge of corrugated at the same time. This one step operation eliminates time consuming precutting. The 2 HP drive converts double-wall corrugated at 49 feet per minutes.

### ■ Environmentally Friendly

Corrugated containers are recycled into cushioning material. Corrugated itself is often made of recycled material and has one of the highest recycling rates of any material in the U.S.

## Ecowatt NeoPower

Production Speed	15 m per minute	49 feet per minute
Power Supply	220V, 3 PH, 60 Hz	2 HP, 15 Amp
Machine Dimensions	Width	590 mm — 23"
	Height	935 mm — 37"
	Depth	1050 mm — 42"
Weight	150 kg	334 lbs
